

## ***COMPANY QUALITY POLICY***

To complete an evolutionary cycle that has characterized a constant improvement of the product as well as of the technologies and techniques used practiced since the foundation of the Company, the Management of POLITECNICA has decided to continue along the path of applying a Management System of Quality according to the ISO 9001: 2015 standard as the best solution to make the work, experience and professionalism acquired to pursue sustainability and business growth and customer satisfaction objective and evident.

In a highly competitive market, the Company has identified satisfaction of customer needs, sustainability and business growth and analysis of the context as the winning means for future development.

The strategic objectives that the General Management intends to achieve are different and can be grouped as follows:

- A. Continuous improvement of company performance both in terms of product and services provided.
- B. Maintain customer satisfaction by respecting both the specifications inherent in the product and those defined by the state of the art, and those provided by the same;
- C. Cost reduction;
- D. Management of the work environment, respecting the laws and increasing the sensitivity, the collaborative spirit and the attention of all Company staff towards all aspects of quality.

The company policy is disseminated to all company levels through meetings and on the job through the example of the Management itself and the contact person for quality.

The Company Policy is periodically re-checked, to assess its adequacy, on the occasion of the System Reviews by the Management.
